

Which aspect of The Grand Delusion angers you the most?

The PCR tests are NOT a valid way to determine COVID-19 “cases.”

Deaths due to COVID-19 have clearly included people who died from some other cause but merely had a false positive PCR test.

Influenza magically disappeared during the past two years.

Masks do NOT stop the spread of respiratory illness and they actually cause a wide range of health and emotional problems.

“Two weeks to stop the spread” was a blatant lie.

Lockdowns do NOT stop the spread, at best they merely delay it.

Remdesivir, Midazolam and ventilators are murder weapons.

The NIH, FDA and CDC ignored many forms of available early treatment which have been shown to reduce hospitalization and death by at least 50%. They have failed in the most basic way.

The Trusted News Initiative was and is an organized plan to hide the truth and prevent open scientific debate about effective treatments and the dangers of the mRNA gene therapy injections.

Participation in medical experiments requires voluntary, informed consent which, due to censorship, is not even possible.

The mRNA gene therapy injections do NOT prevent infection.

They also do NOT stop transmission to others.

Their clinical trials did NOT demonstrate that the injections prevent death.

Countries, states and areas where injection rates are highest do NOT show reduced infection or death rates.

The spike protein used in the injections is NOT circulating among the general population. Getting a “booster” to protect against a portion of a virus that is known to NOT be in circulation is clearly NOT an effective therapy. It's insane.

The FDA knew of the potential for the mRNA injections to cause heart attacks, strokes, blood clots, thrombocytopenia, myocarditis, pericarditis, Guillain-Barré syndrome, Bell's Palsy and many other adverse events in late 2019, but they still approved the injections and the boosters.

Millions of Americans caught COVID-19 and recovered, so they have natural immunity that should be counted towards the herd immunity of society as a whole.

Mandates are clearly a form of extortion. Mandating a therapy that causes injury and does not improve health is a crime.

Tens of thousands of people have died because they have been denied effective early treatment, been given deadly “approved” treatments or have been coerced into receiving experimental gene therapy injections that cause a wide range of adverse events that include death and permanent injury.

Stand Up and STOP These Crimes Against Humanity!
